

Instructions for *ACL Proceedings

Anonymous ACL submission

Abstract

This document is a supplement to the general guidelines for *ACL authors. It contains instructions for using the LibreOffice template for ACL conferences. The document itself conforms to its own specifications, and is therefore an example of what your manuscript should look like. These instructions should be used both for papers submitted for review and for final versions of accepted papers.

1 Introduction

If the paper is accepted, remove the header, footer (page numbers), any line numbering, and the ruler for the final version.

2 Title section 2

At vero eos et accusamus et iusto odio dignissimos ducimus qui blanditiis praesentium voluptatum deleniti atque corrupti quos dolores et quas molestias excepturi sint occaecati cupiditate non provident, similique sunt in culpa qui officia deserunt mollitia animi, id est laborum et dolorum fuga. Et harum quidem rerum facilis est et expedita distinctio. Nam libero tempore, cum soluta nobis est eligendi optio cumque nihil impedit quo minus id quod maxime placeat facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet ut et voluptates repudiandae sint et molestiae non recusandae. Itaque earum rerum hic tenetur a sapiente delectus, ut aut reiciendis voluptatibus maiores alias consequatur aut perferendis doloribus asperiores repellat.

Ut enim ad minima veniam, quis nostrum exercitationem ullam corporis suscipit laboriosam, nisi ut aliquid ex ea commodi consequatur? Quis autem vel eum iure reprehenderit qui in ea voluptate velit esse quam nihil molestiae consequatur, vel illum qui dolorem eum fugiat quo voluptas nulla pariatur?

2.1 Title subsection

Text of the subsection.
Bla bla bla bla...

2.1.1 Title subsubsection

If you want to add another level, just create a new style inherited from 'ACL Subsection' and add it to the chapter numbering level (Tools > Chapter numbering...).

3 Figures and tables

Creating: To create a new Figure or Table, insert a Frame where you want it to appear (generally, centered at the top of a column close to where it is referred to) and then fill it in with the Figure (or Table). Right click to add Caption, with the ACL Caption style (or ACL Caption Long style for multi-line captions), which places 10 pt below and above the caption.

Numbering: To update numbering, highlight all the relevant text (*e.g.*, **Ctrl-A + F9**). This will update all the numbering applicable to tables, figures, equations, and headings.

Type of text	Font size	Style
Paper title	15 pt	bold

The word “Abstract”	12 pt	bold

References

Cross-referencing: To add a cross reference to a figure or table, go to Insert > Cross-reference and select the object you want to refer to (be sure to select the option “Category and number” if you want to see a text like “Table 1”).

4 References and citations

To create hyperlinks between citations and references, as you insert each full reference in the References section, highlight it and then select Insert, Hyperlink. In the left-hand menu, select Document and then Target in document. You’ll see from the options in the menu, the field Bookmarks: click it and select the bookmark corresponding to the citation of your interest. Link back to the reference from its citations in the text by highlight the citation, right clicking, and selecting Insert, Cross-Reference, then selecting the Bookmark you’ve saved. So, for example, you’ll see the text of the citation like that: [Aho & Ullman \(1972\)](#). After you’ve done all this procedure, you should see the text of the citation in Dark Blue, Color Hex #000099.
